

2018

Security 'Health of the Nation' Survey

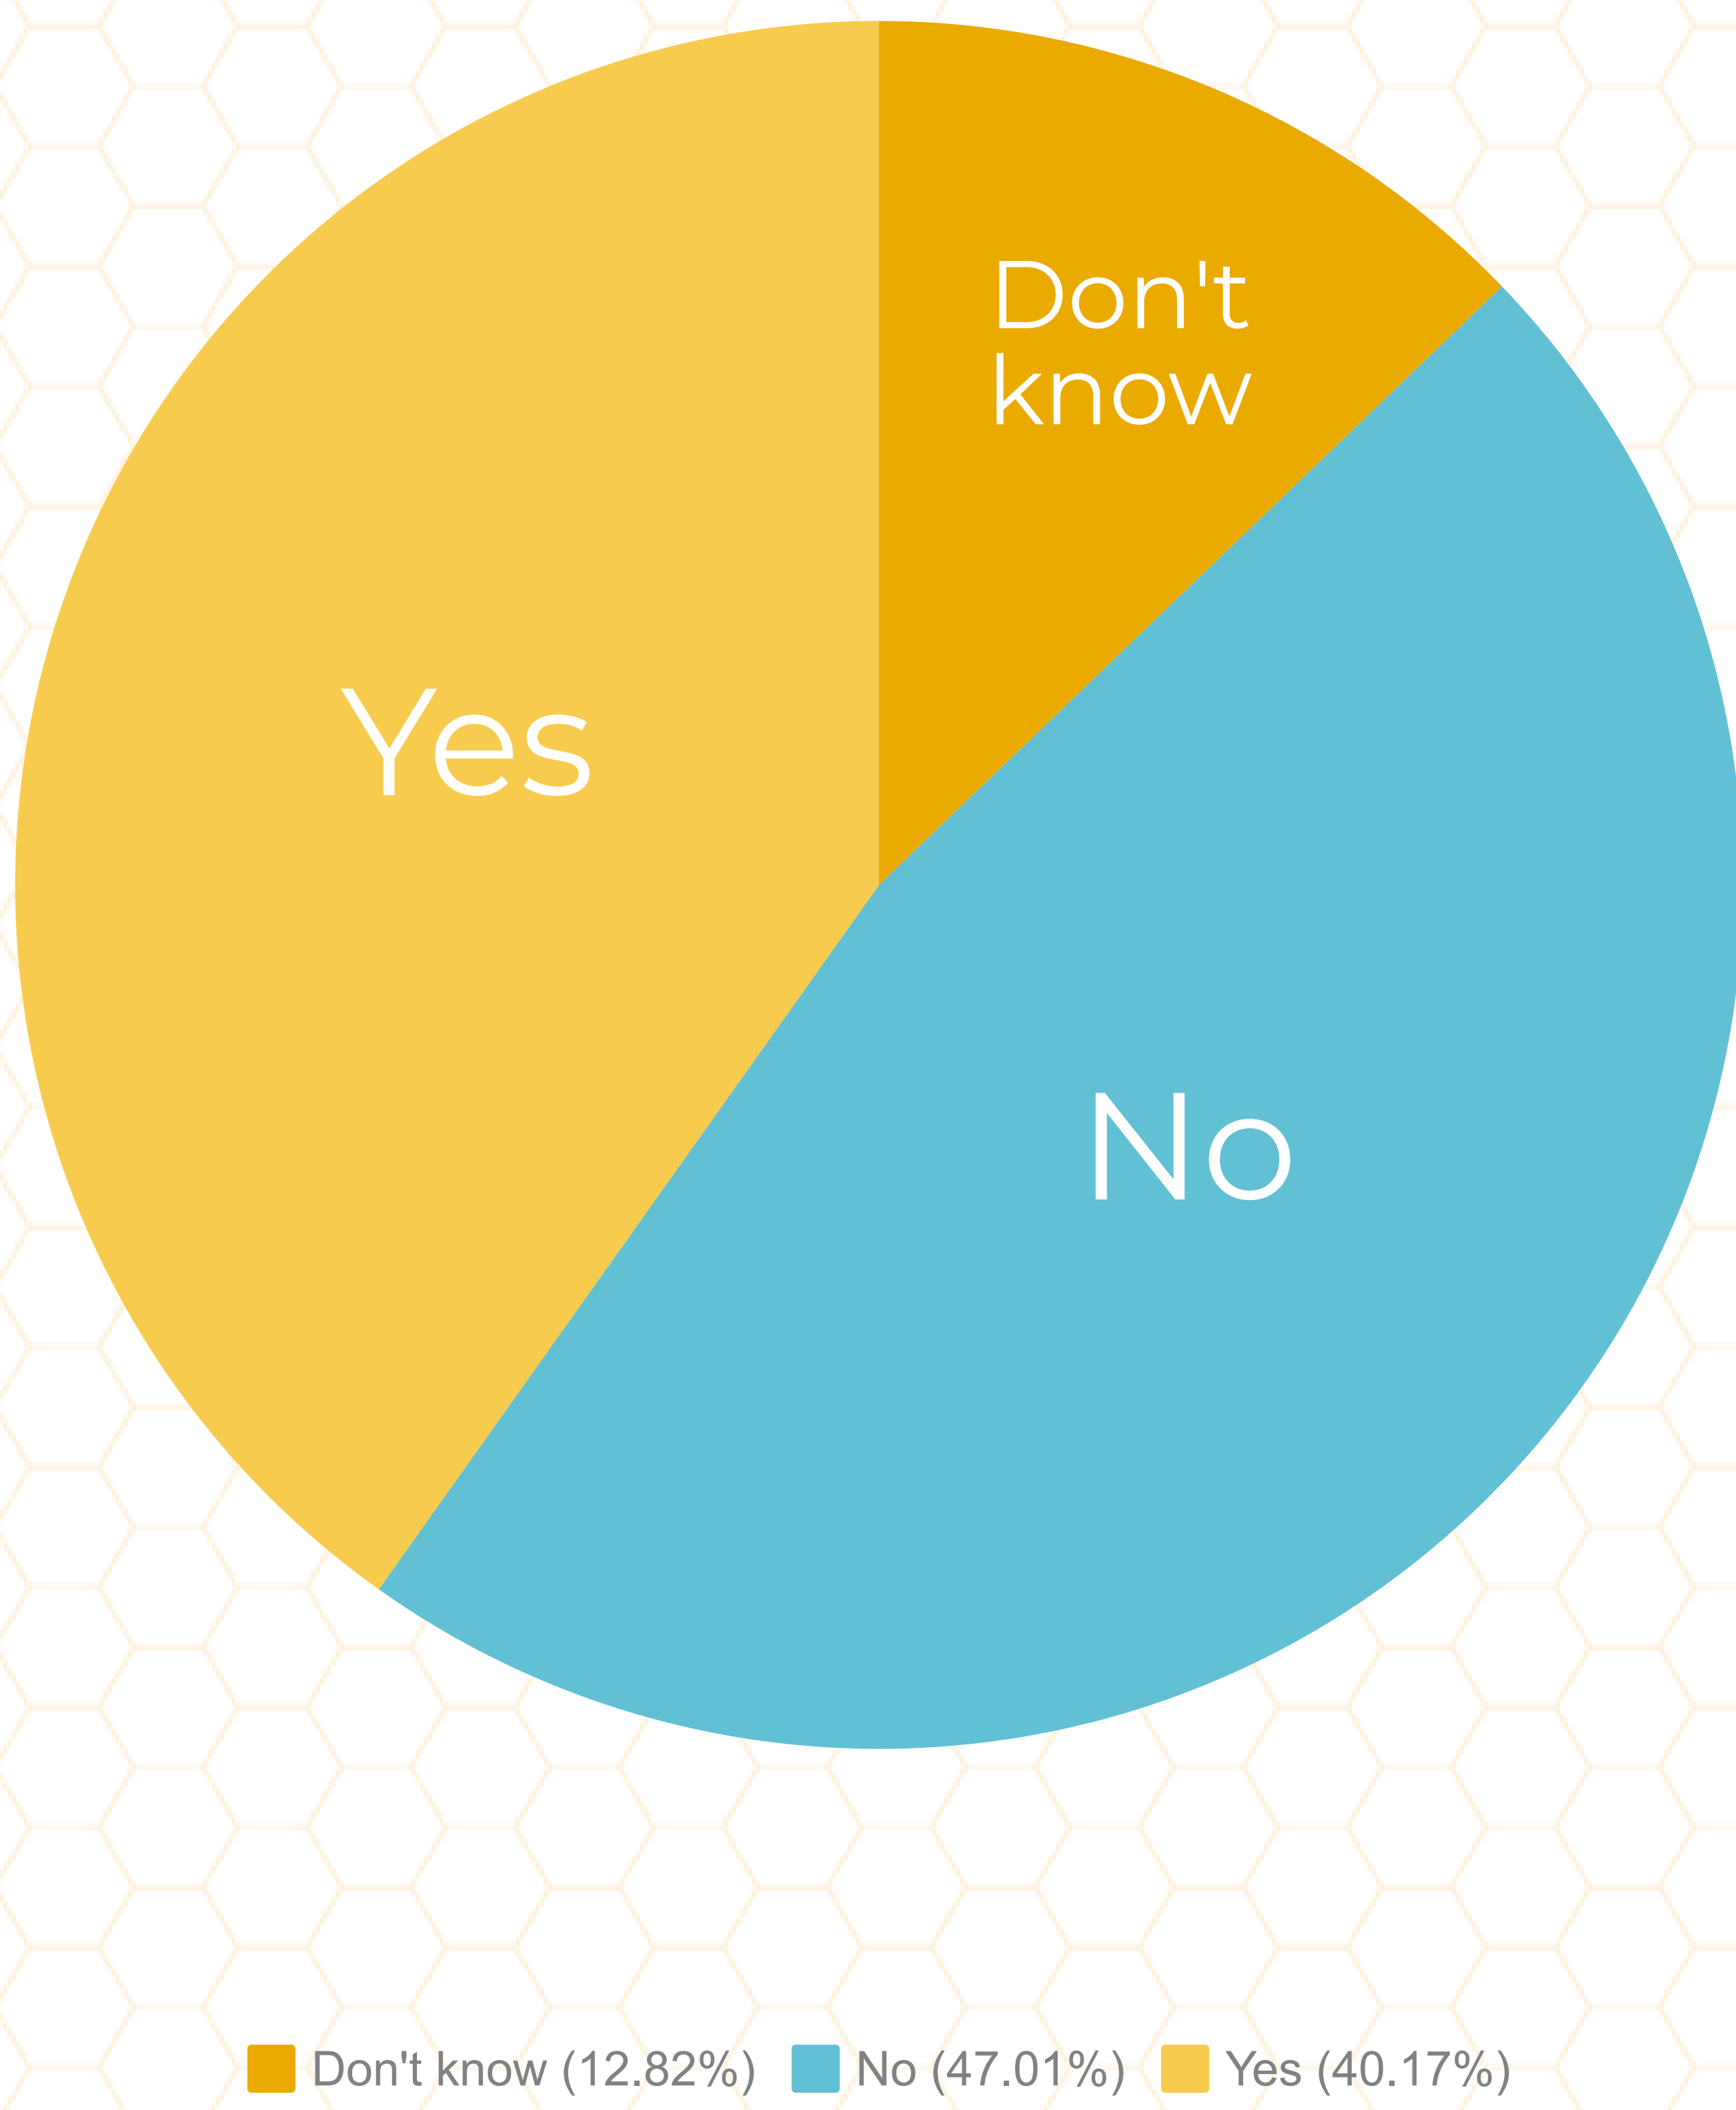

In February 2018, US Signal surveyed nearly 120 IT professionals offering insights into the security health of their companies. The most mentionable findings included some of the following statistics.

81%

of organizations witnessed an increase in cybersecurity challenges in the past year

Percentage of IT professionals who had a security issue across their infrastructure in the past year.

Top 3 Security Concerns

Protecting against email-related threats like ransomware, malware and phishing

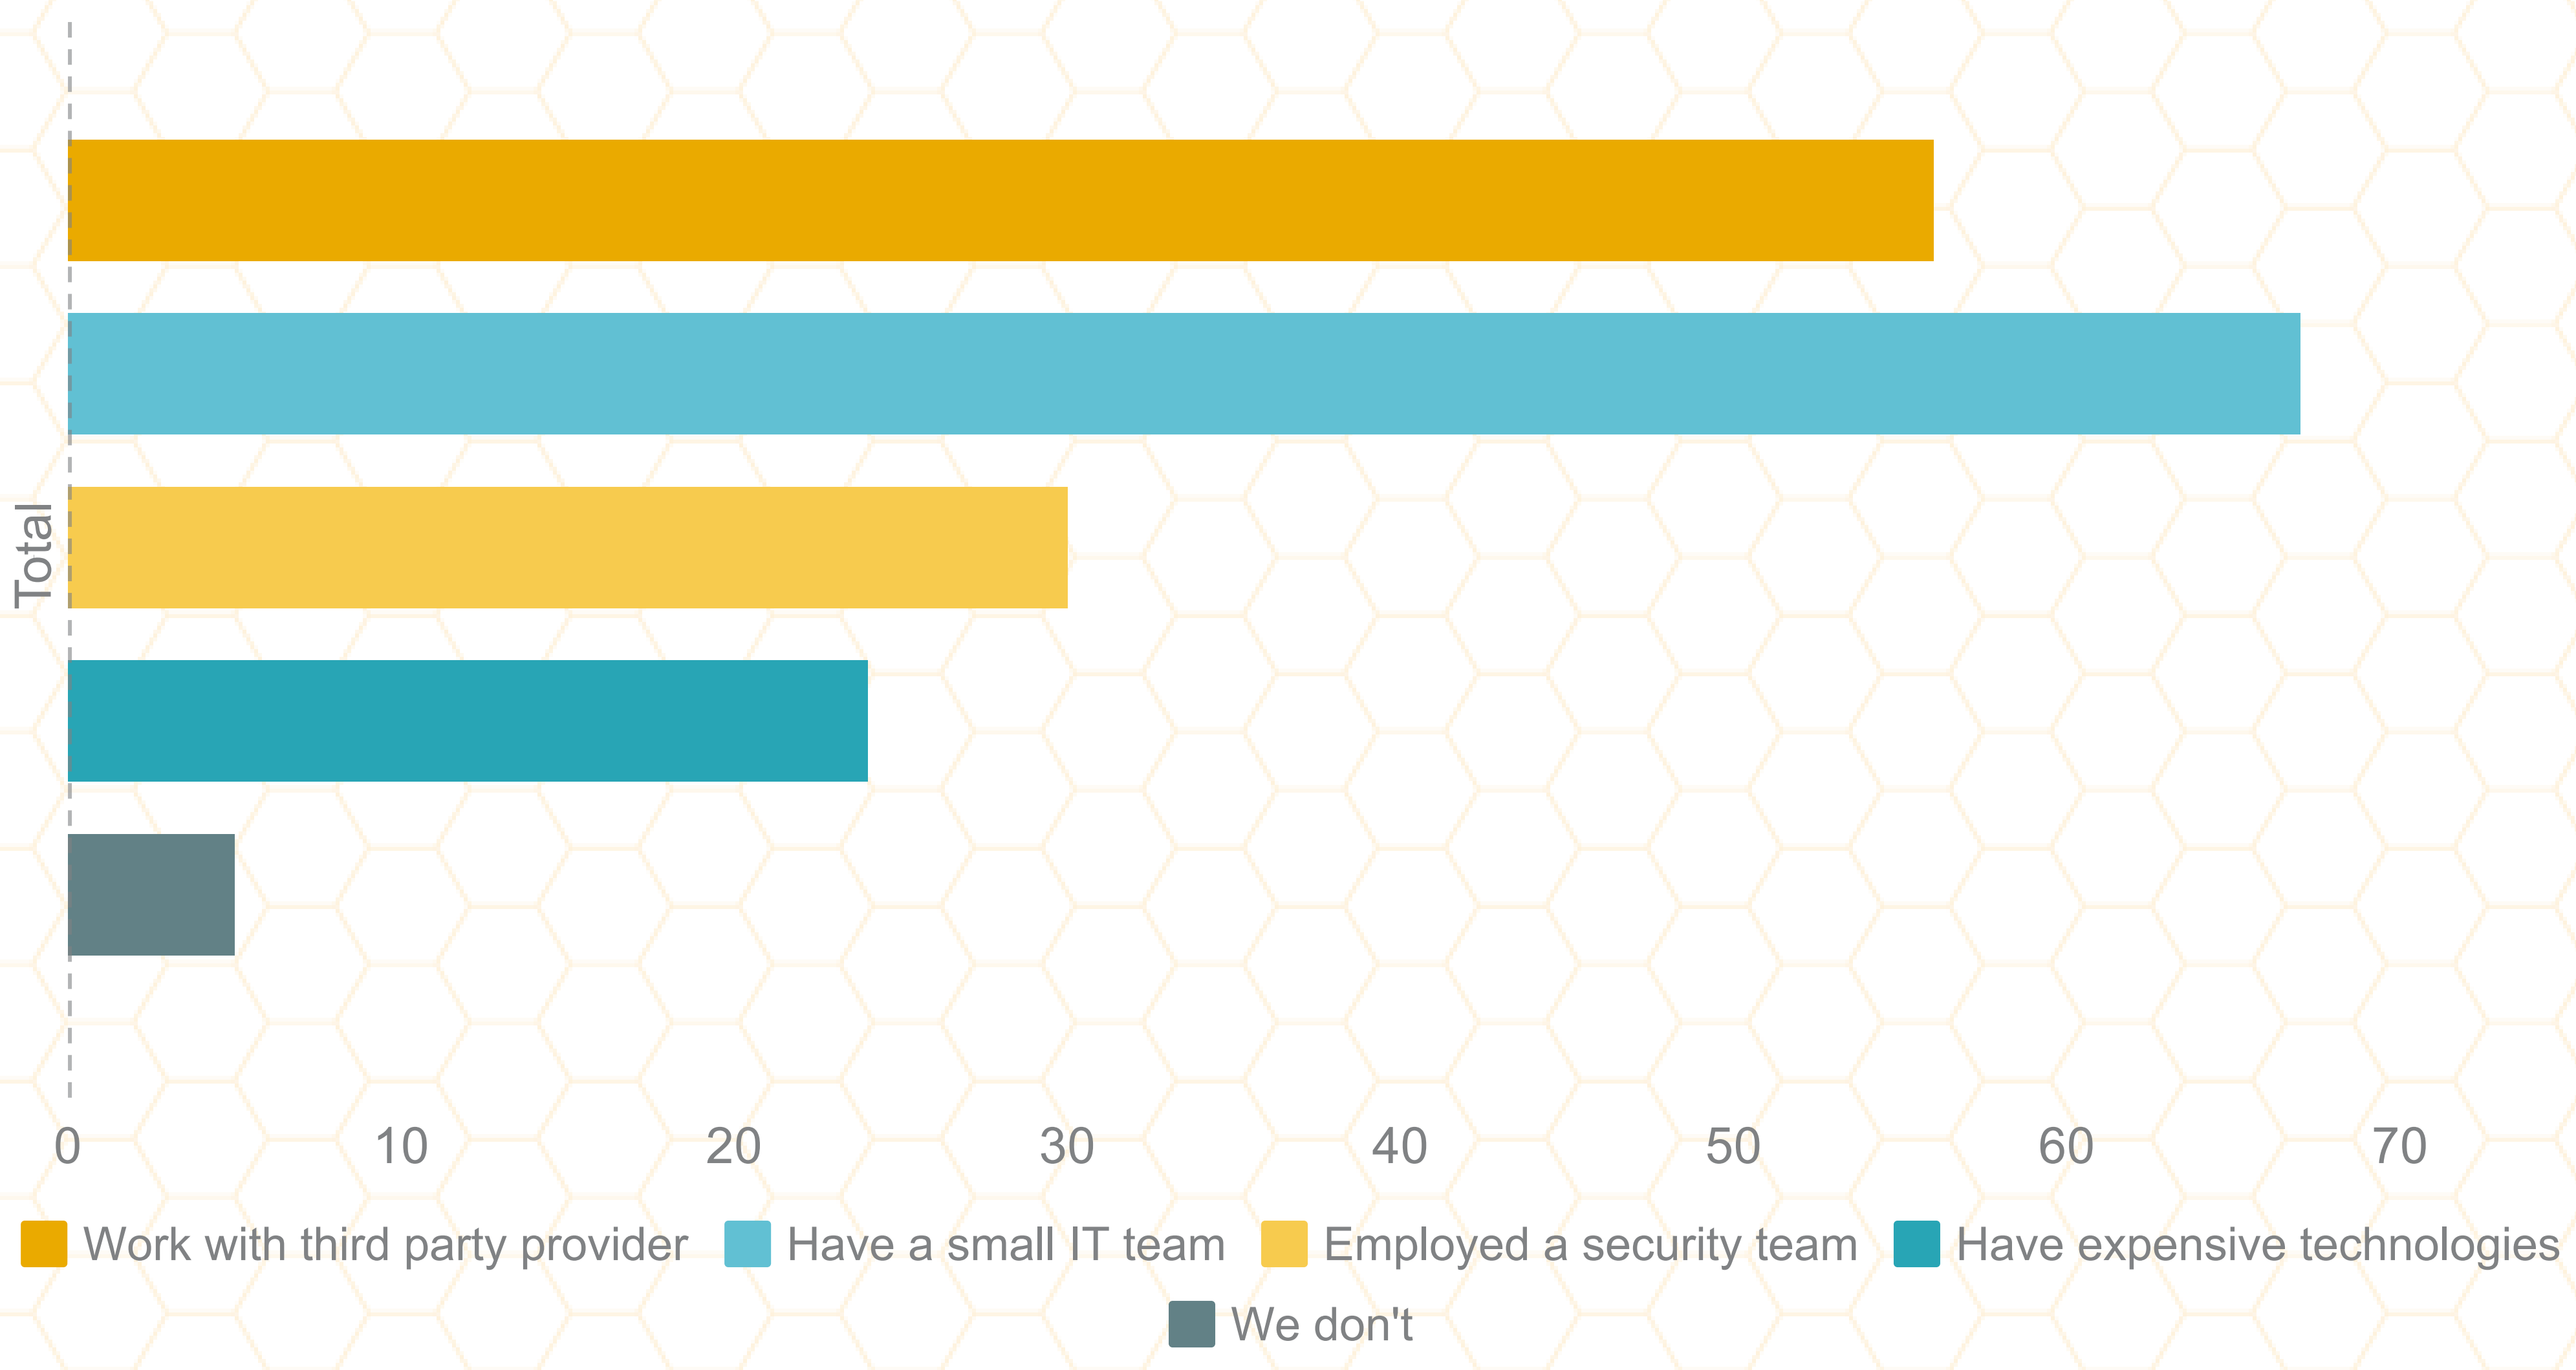

Managing legacy systems with little or no security updates available

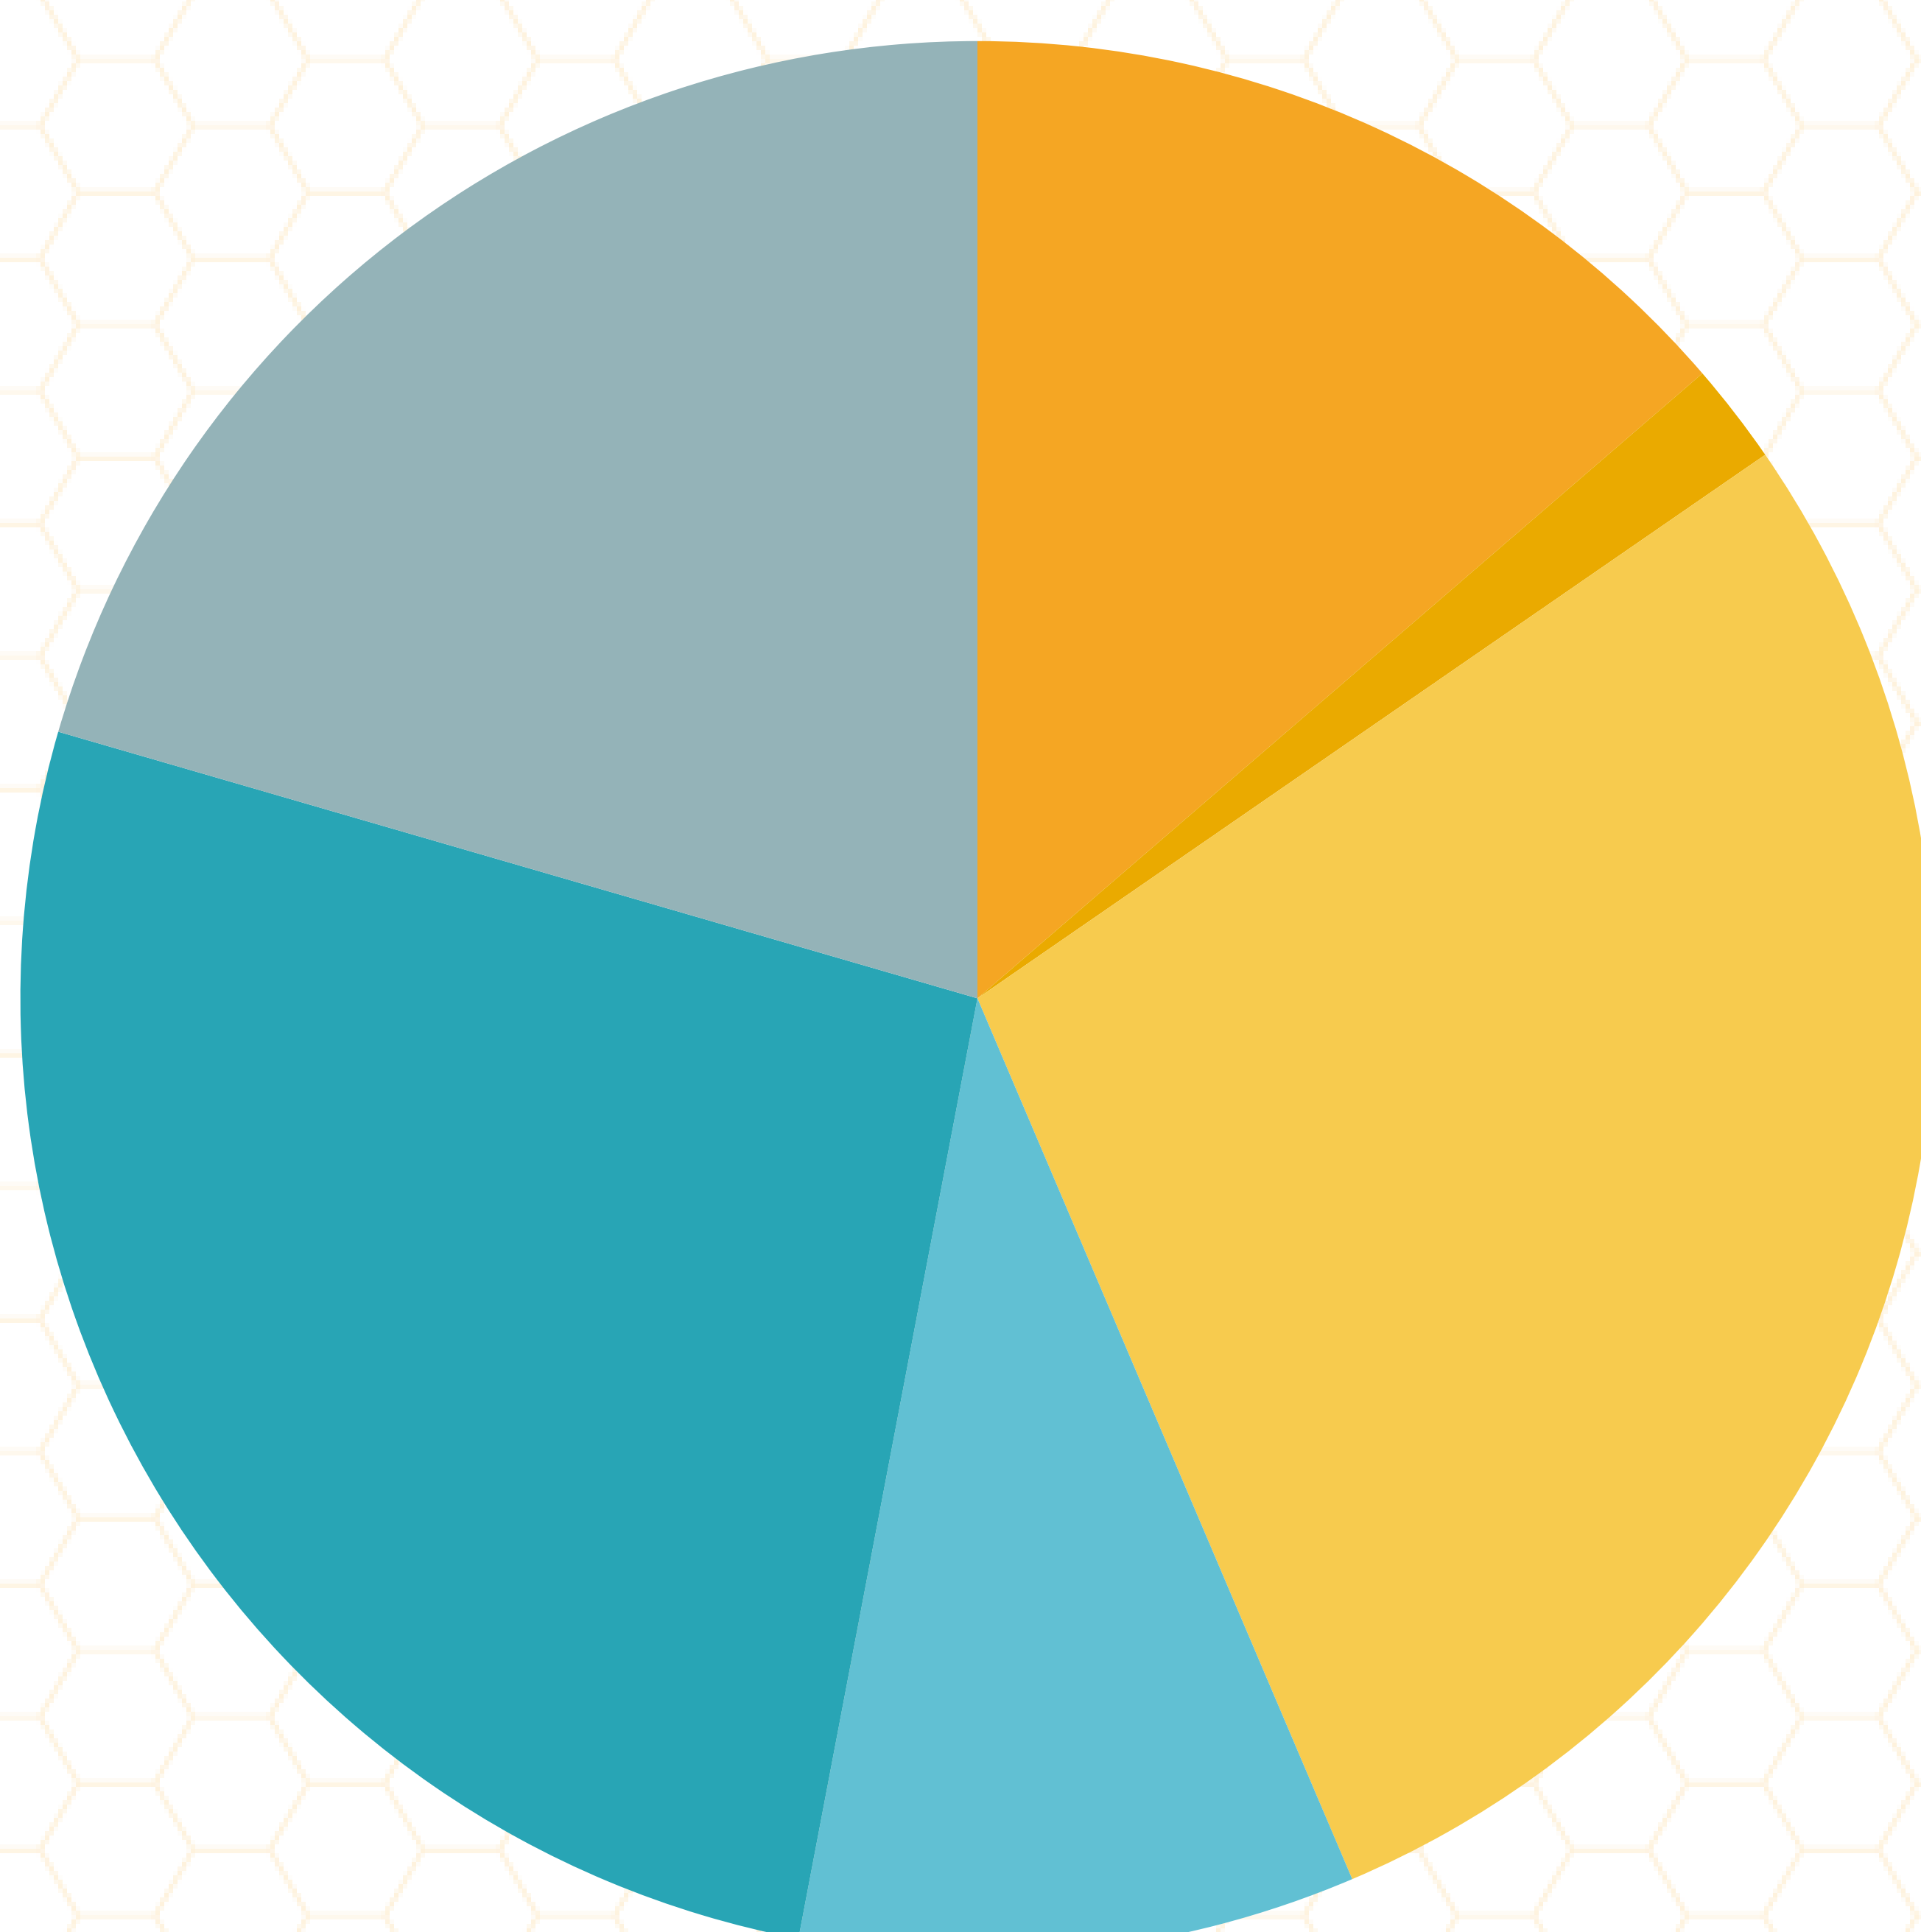

Ensuring the company is always up to date with patches and updates

Of those surveyed, it was found that businesses stay on top of emerging threats and solutions in a variety of ways

Nearly half of the respondents are not sure if GDPR affects their company or said they will not be ready to comply when it goes into effect, while the other half are more confident in their preparations.

How ready is your organization for General Data Protection Regulation (GDPR) compliance, effective May 25, 2018?

Not Ready

- We won't be ready for the deadline but it's a priority (13.68%)
- We won't be ready and are concerned (1.71%)
- We are not sure if it applies to our organization (28.21%)

Ready

- We are 100% ready now (9.4%)
- We will be ready before the deadline (26.5%)
- We are positive it does not apply to our organization (20.51%)
